* Pseudo code : Factorial :-

1- Ask the user to add a value (n).
2- store the value, If: $n \geq 0$, else: end.
3- if $n = 0$, or, if $n = 1$, then f.n = 1.
4- find the factorial (of n):-
(-$n! = n * (n-1) * (n-2) * \ldots 1$,)

5- store the result.
6- print result.
